About North American Adhesives

For more than 30 years, the North American Adhesives (NAA) brand of flooring-installation products has stood for quality, innovation and a pioneering spirit that meets the demands of a growing and evolving floor-covering industry. A competitive range of NAA products are available to distributors/dealers who want to stay ahead of the curve. Product categories include self-leveling underlayments; moisture-control products; patching, repairing and skimcoating compounds; and floor-covering adhesives. Plus, all NAA products sold in the USA are made in the USA.

What is Green Label Plus?

NAA’s carpet/wood/resilient adhesives, primers and moisture barriers with this logo are certified by the Carpet & Rug Institute’s Green Label Plus program for VOC emissions (CA-DPH 01350 chamber test). Additionally, VOC emission chamber testing (CA-DPH 01350) has been performed for NAA’s patching compounds and self-leveling products.

What does it mean to be Red List Free?

When a product is in its developmental stage, all factors influencing its impact on the environment and human health are evaluated from a sustainable perspective. This evaluation includes reducing and replacing “chemicals of concern” (e.g., formaldehyde, phthalates and isocyanates) with chemicals that have a lower risk, which then grants products with Living Building Challenge’s “Red List Free” status.

</table>
NA 400 Self-Leveler
Self-Leveling Underlayment for Interior Floors
50 lbs. (22.7 kg) – Plastic bag

NA 400 Self-Leveler is a high-compressive-strength, cement-based underlayment and repair mix that is easy to pour and that seeks its own level. It is ideal for leveling, smoothing and repairing interior floors up to 1” (2.5 cm) in a single application. NA 400 is extremely convenient: Just mix with water and pour over the floor substrate. Its fast cure time allows tile to be installed after just 24 hours.

NA 420 LP Leveler Rapid
Low-Preparation, High-Performance, Rapid-Setting, Self-Leveling Underlayment
50 lbs. (22.7 kg) – Plastic bag

NA 420 LP Leveler is a low-preparation, self-leveling, calcium-aluminate-based underlayment and repair mix for interior concrete and engineer-approved floors. Its unique formulation allows for direct application on substrates that are clean, securely bonded and properly primed. NA 420 has high strength and is abrasion-resistant, and is able to accept tile and stone 16 hours after installation and moisture-sensitive floor coverings after 36 hours. NA 420 has a compressive strength of greater than 3,500 psi (24.1 MPa) after 28 days. NA 420 is quite fluid and, once mixed, can be easily installed from featheredge to 1” (2.5 cm) in a single lift.

NA 450 LP Leveler Rapid
Low-Preparation, High-Performance, Rapid-Setting, Self-Leveling Underlayment
50 lbs. (22.7 kg) – Plastic bag

NA 450 LP Leveler Rapid is a low-preparation, rapid-setting, self-leveling underlayment that typically requires only a clean, securely bonded and properly primed substrate before application. NA 450 is quite fluid once mixed and it can be easily installed from featheredge to 2” (5 cm) in a single lift. Typically requiring reduced surface preparation, NA 450 provides lower installation costs and fast turnaround on jobsites. NA 450 is able to accept tile and stone after 3 to 4 hours of installation and moisture-sensitive floor coverings after 16 to 24 hours. It has a compressive strength of greater than 4,100 psi (28.3 MPa) after 28 days.

NA 220 Concrete SL Primer
Acrylic Latex Primer for Concrete
1 U.S. gal. (3.79 L) – Jug

NA 220 Concrete SL Primer is a concentrated, solvent-free acrylic primer that is used before the installation of underlayment materials. It is green for easy identification. NA 220 improves the bond between a properly prepared and profiled concrete substrate, and self-leveling underlayment. NA 220 can also be used as a primer for gypsum-based underlayments and patches.

NA 310 Self-Leveler Primer
All-Purpose Primer for Self-Leveling Underlayments
2 U.S. gals. (7.57 L) – Jug
1 U.S. qt. (946 ML) – Bottle

NA 310 Self Leveler Primer is a low-VOC, water-based acrylic primer that enhances the performance and adhesion of self-leveling underlaminents (SLUs) on nonabsorbent surfaces such as ceramic tile, vinyl composition tile (VCT) and adhesive residue, as well as on profiled, absorbent surfaces. Ideal for a wide variety of substrates, NA 310 dries clear and combines excellent versatility with easy application. It is compatible with NA 400 Self-Leveler.
**NA 500**
**FLOOR PATCH**
Rapid-Setting Patching Compound with Polymer
25 lbs. (11.3 kg) – Plastic bag

NA 500 Floor Patch is a fast-setting, latex-fortified, sanded, cement-based patching compound with high compressive strength. When NA 500 is mixed with water, floor coverings can be installed in just 1 hour after application. When mixed with the latex liquid NA 501 Floor Patch Additive, NA 500 can be used as an embossing leveler or to encapsulate cutback adhesive residue.

**NA 501**
**FLOOR PATCH ADDITIVE**
Latex Liquid for NA 500 Floor Patch
1 U.S. gal. (3.79 L) – Jug

NA 501 Floor Patch Additive is an acrylic latex additive for use with NA 500 Floor Patch to improve adhesion and flexibility. When NA 500 is mixed with NA 501, the floor patch system can be used as an embossing leveler or to encapsulate cutback adhesive residue. NA 501 also increases the working time of NA 500.

**NA 600**
**MULTI PATCH™**
Versatile, High-Performance Concrete Patch
25 lbs. (11.3 kg) – Plastic bag

NA 600 Multi Patch is a fast-setting, versatile, cementitious material used for the patching of interior/exterior concrete surfaces including concrete floors, residential driveways, sidewalks, and concrete pads. NA 600 Multi Patch minimizes jobsite turnaround time by setting fast for easy and cost-efficient patching of horizontal substrates before application of self-leveling underlayments.

**NA 655**
**PREMIUM SKIMCOAT**
Highly Polymer-Modified Skimcoating and Patching Compound
10 lbs. (4.54 kg) – Plastic bag

NA 655 Premium Skimcoat is a high-performance, highly polymer-modified, fiber-reinforced cement-based skimcoating and patching compound. Use NA 655 to skimcoat and smooth minor surface variations and defects on common substrates. NA 655 creates a strong, durable surface ready for almost any floor application. Its unique formulation mixes easily with water and produces an easy-to-apply patching compound. Rapid-setting NA 655 allows for fast-track flooring installations in 30 to 60 minutes after application, depending on thickness and environmental conditions.
Surface-Preparation Products

VAPOR GUARD™ PRO
Ready-to-Use Membrane for Subfloor Moisture Treatment
4 U.S. gals. (15,1 L) – Pail

Vapor Guard Pro is a high-solids, fast-drying, polymer-based compound formulated to treat moisture in concrete slabs of up to 15 lbs. per 1,000 sq. ft. (6,80 kg per 92,9 m²) per 24 hours, and up to 95% relative humidity when applied in a double-coat method. It also serves to control elevated alkalinity (pH) on concrete slabs and isolate old adhesive residues in direct glue-down floor-covering applications.

Surface-Preparation Products

NA 1510
MEMBRANE PRIMER
Roller-Applied Crack-Isolation Membrane Primer
5 U.S. gals. (18,9 L) – Pail
1 U.S. gal. (3,79 L) – Jug

NA 1510 Membrane Primer is a water-based, acrylic membrane primer designed for priming properly prepared substrates before installing peel-and-stick membranes. Applied by roller or brush, a coat of NA 1510 is ready for NA 1550 Crack-Isolation Membrane after about 15 minutes of drying time.

NA 1550
CRACK-ISOLATION MEMBRANE
Peel-and-Stick Flexible Fabric for Crack Isolation and Sound Reduction
39.4” X 68.6 ft. (1 X 20,9 m) – Roll
for 225 sq. ft. (20,9 m²)

NA 1550 Crack-Isolation Membrane is a flexible, thin, lightweight, load-bearing, “self-adhered” membrane over which ceramic tile and natural stone can be installed immediately with any polymer-modified cement mortar. NA 1550 can be used to prevent in-plane floor cracks (up to 3/8” [10 mm] wide) from transferring through tile, stone and grout, and to help prevent gaps in wood-floor installations due to subfloor movement. NA 1550 is also excellent for use in multi-story buildings to reduce airborne and impact sound transmission between floors.
**EVER BOND™ PSA SUPER**

**Supreme, Pressure-Sensitive Flooring Adhesive**
- 4 U.S. gals. (15,1 L) – Pail
- 1 U.S. gal. (3,79 L) – Pail
- 1 U.S. qt. (946 ML) – Pail

Ever Bond PSA Super is an extremely aggressive, pressure-sensitive adhesive that is designed for the installation of a wide variety of flooring types, including engineered wood flooring, resilient flooring and carpet tile. Ever Bond PSA Super has been specifically formulated to provide extended working time and can be applied using a trowel or roller, depending on the level of tack required for the flooring being installed. The product has low odor, low VOCs, has met the requirements for indoor air quality under the Carpet and Rug Institute’s Green Label Plus program, and can also contribute to LEED credits.

**CARPET LOCK™ PRO**

**Contract Carpet Adhesive**
- 4 U.S. gals. (15,1 L) – Pail

Carpet Lock Pro is a medium-solids, latex-based, contract carpet adhesive that is designed for the installation of most carpet types and felt-backed vinyl sheet flooring. Carpet Lock Pro provides quick-grabbing performance and a tough final bond. Carpet Lock Pro is suitable to install carpet and felt-backed vinyl sheet flooring in medium-traffic commercial applications. Carpet Lock Pro contains a small amount of solvent for faster performance and enhanced bonding characteristics.

**CARPET LOCK™ PLUS**

**Commercial Multipurpose Adhesive**
- 4 U.S. gals. (15,1 L) – Pail

Carpet Lock Plus commercial-grade multipurpose adhesive is a superior-performing floor-covering adhesive, specifically designed for hard-to-bond synthetic carpet backings such as latex unitary and ActionBac, as well as most felt-backed resilient floor coverings. This high-tack adhesive grabs quickly, permits ample open time and provides an exceptionally strong permanent bond. Carpet Lock Plus contains a small amount of solvent for faster performance and enhanced bonding characteristics.

**CARPET LOCK™ SUPER**

**Supreme Commercial Carpet Adhesive**
- 4 U.S. gals. (15,1 L) – Pail

Carpet Lock Super is a supreme commercial, high-performance, high-solids, floor-covering adhesive specifically designed for hard-to-bond carpet backings as well as most felt-backed resilient floor coverings. Carpet Lock Super is a very tacky adhesive that develops rapid early legs, grabs quickly and provides an exceptionally strong permanent bond. Carpet Lock Super contains a small amount of solvent for faster performance and enhanced bonding characteristics.

**EVER BOND™ PSA PRO**

**Pressure-Sensitive Flooring Adhesive for Carpet Tile and Resilient Floor Coverings**
- 4 U.S. gals. (15,1 L) – Pail
- 1 U.S. gal. (3,79 L) – Pail

Ever Bond PSA Pro is a high-solids, acrylic, emulsion-based, pressure-sensitive adhesive for the installation of carpet tile and resilient floor coverings. Ever Bond PSA Pro resists plasticizer migration, provides exceptional tack and has great adhesion to all common types of floor surfaces. Ever Bond PSA Pro can be used to create a permanent or releasable bond – depending on the installation method – and can be applied by spray, roller or trowel.
**MULTI LOCK™ PLUS**
Professional Multipurpose Flooring Adhesive
4 U.S. gals. (15,1 L) – Pail

Multi Lock Plus is a medium-solid, latex-based flooring adhesive with excellent bond and aging characteristics. **Multi Lock Plus** will provide a tough, rubbery bond line that has superior tack and outstanding rebond characteristics. Its formulation has been specifically crafted to provide ample working time for carpets with patterns as well as for the positioning of felt-backed vinyl sheet flooring.

---

**MULTI LOCK™ SUPER**
Commercial, Rapid-Set, Multipurpose Flooring Adhesive
4 U.S. gals. (15,1 L) – Pail

**Multi Lock Super** is a high-performing floor-covering adhesive that is specifically designed for hard-to-bond carpets as well as most felt-backed resilient floor coverings. Its high-solids formulation is great for use in the wet-lay installation method, so that no flash time is required. This high-tack adhesive grabs quickly, permits ample open time and provides an exceptionally strong permanent bond. **Multi Lock Super** is perfectly suited for use in high-traffic commercial conditions.

---

**EVER BOND™ PSA PLUS**
Transforming, Pressure-Sensitive, Solid Vinyl Sheet Adhesive
4 U.S. gals. (15,1 L) – Pail

**Ever Bond PSA Plus** is a high-performance, wet-lay and “transforming” pressure-sensitive adhesive that is designed specifically for installing homogeneous and heterogeneous solid vinyl flooring. With its strong, durable, moisture-resistant and alkali-resistant bond, it is ideal for commercial and institutional applications. **Ever Bond PSA Plus** has an excellent open time, develops strength quickly, performs well under rolling loads and resists indentation. After the working time is over and as the tackiness of the product starts to dissipate, the shear strength and bond strength will start to increase. This “transforming” change happens slowly and bond strength continues to climb slowly even weeks after the initial installation. **Ever Bond PSA Plus**’s low volatile organic content and low odor make it ideal for use in occupied buildings such as hospitals and medical centers.

---

**MULTI LOCK™ PRO**
Contract Multipurpose Adhesive
4 U.S. gals. (15,1 L) – Pail

**Multi Lock Pro** is a medium-solids, latex-based adhesive with good bond strength and rebond characteristics. **Multi Lock Pro** dries to a flexible, rubbery bond line with good tack. Light in color, **Multi Lock Pro** is a good choice for the installation of basic carpet types and felt-backed vinyl sheet flooring in residential and light commercial applications. **Multi Lock Pro** is ideally suited for flooring installations that may need removal within 2 to 3 years, such as installations in rental properties as well as main-street commercial and retail outlets.

---

**MULTI LOCK™ PLUS**
Transforming, Pressure-Sensitive, Solid Vinyl Sheet Adhesive
4 U.S. gals. (15,1 L) – Pail

**Multi Lock Plus** is a high-performance, wet-lay and “transforming” pressure-sensitive adhesive that is designed specifically for installing homogeneous and heterogeneous solid vinyl flooring. With its strong, durable, moisture-resistant and alkali-resistant bond, it is ideal for commercial and institutional applications. **Ever Bond PSA Plus** has an excellent open time, develops strength quickly, performs well under rolling loads and resists indentation. After the working time is over and as the tackiness of the product starts to dissipate, the shear strength and bond strength will start to increase. This “transforming” change happens slowly and bond strength continues to climb slowly even weeks after the initial installation. **Ever Bond PSA Plus**’s low volatile organic content and low odor make it ideal for use in occupied buildings such as hospitals and medical centers.
**Single-Purpose Flooring Adhesives**  
For Wood Flooring

**TIMBER BOND™ PRO**  
Urethane Wood-Flooring Adhesive  
4 U.S. gals. (15,1 L) – Metal pail  
Timber Bond Pro is a 100%-solids, one-component, moisture-cured urethane adhesive specifically designed for the installation of domestic solid and engineered wood flooring.

**TIMBER BOND™ PLUS**  
Universal Urethane Wood-Flooring Adhesive  
4 U.S. gals. (15,1 L) – Metal pail  
Timber Bond Plus is a 100%-solids, one-component, moisture-cured urethane adhesive specifically designed for the installation of domestic and exotic solid and engineered wood flooring, including bamboo.

**TIMBER BOND™ SUPER**  
3-in-1 Moisture-Control, Sound-Reduction and Wood-Flooring Urethane Adhesive  
4 U.S. gals. (15,1 L) – Metal pail  
Timber Bond Super is a 3-in-1, 100%-solids, one-component, moisture-curing urethane adhesive for all types of wood flooring and bamboo. Timber Bond Super provides sound-reduction properties, making it suitable for use in multi-unit housing projects. It also provides excellent bond strength and moisture control of the concrete slab up to 25 lbs. (11,3 kg) moisture vapor emission rate (MVER) and 100% relative humidity (RH).

**TIMBER BOND™ E**  
Water-Based, Engineered Wood-Flooring Adhesive  
4 U.S. gals. (15,1 L) – Pail  
Timber Bond E is a professional-grade, high-tack, high-solids wood-flooring adhesive specifically designed for the installation of traditional engineered wood floors. Use for the installation of engineered wood plank, acrylic impregnated plank and wood parquet.

**TIMBER BOND™ MS**  
Modified-Silane, 3-in-1 Moisture-Control, Sound-Reduction and Wood-Flooring Adhesive  
4 U.S. gals. (15,1 L) – Pail  
Timber Bond MS is a single-component, 100%-solids, modified-silane wood-flooring adhesive that is formulated without water, solvents, amines, isocyanates, phthalate plasticizers or epoxy resins. With an extremely low emission level of volatile organic compounds (VOCs), the unique formulation of Timber Bond MS provides excellent bond strength and moisture control up to 15 lbs. (6,80 kg) moisture vapor emission rate (MVER) and 90% relative humidity (RH). Special trowel clips are provided to apply the adhesive in a monolithic layer for subfloor moisture control. It can also be used with traditional trowel-applied methods where subfloor moisture problems do not exist.
Single-Purpose Flooring Adhesives  For Carpet

CARPET LOCK™ OUTDOOR
All-Weather Exterior Carpet Adhesive
3.5 U.S. gals. (13.2 L) – Pail
1 U.S. gal. (3.79 L) – Pail

Carpet Lock Outdoor is a high-strength, water-resistant adhesive for the permanent installation of outdoor carpet and artificial turf. Carpet Lock Outdoor sets rapidly to provide a secure bond in just a few hours. It is ideal for enclosed patios, screened-in porches, sidewalks and open decks.

Cove Bond is a commercial-grade wall-base adhesive with an acrylic base and light color that will not stain. Cove Bond offers a superior bond and impact resistance for rubber, vinyl and carpet wall base. Greater grab and wet strength keep corners wrapped tight. Cove Bond can also be used to install various types of carpet in vertical/wall applications.

Single-Purpose Flooring Adhesives  For Resilient Flooring

COVE BOND™
Wall-Base Adhesive
4 U.S. gals. (15.1 L) – Pail
1 U.S. gal. (3.79 L) – Pail
30 U.S. oz. (887 mL) – Cartridge

VCT BOND™ PLUS
Clear Thin-Spread VCT Adhesive
4 U.S. gals. (15.1 L) – Pail

VCT Bond Plus is a VOC-compliant, latex-resin adhesive that is specifically designed for the installation of vinyl composition tile (VCT) in primarily commercial and institutional applications. It flashes quickly and has a strong initial tack that remains tacky for up to 12 hours. VCT Bond Plus dries rapidly to a thin and semi-transparent film, allowing layout chalk lines to remain visible for easier installation. VCT Bond Plus contains a small addition of solvent to the formulation for faster performance and enhanced bonding characteristics.

VCT BOND™ SUPER
Premium Clear, Thin-Spread VCT Adhesive
4 U.S. gals. (15.1 L) – Pail
1 U.S. gal. (3.79 L) – Pail
1 U.S. qt. (946 mL) – Pail

VCT Bond Super provides fast dry times, good grab and excellent slip resistance. Use it to install vinyl composition tile (VCT) on approved substrates as well as over an existing single layer of VCT. With good moisture resistance, it is suitable for use over fresh concrete slabs with moisture vapor emission rates (MVERs) up to 8 lbs. per 1,000 sq. ft. (3.63 kg per 92.9 m²) per 24 hours.
